# “How to Happily Un-Retire”

## Shifting to A New Paradigm of Retirement

Over 10,000 people (Baby Boomers born between 1946 and 1964) are retiring on a daily basis. This trend has started in 2011 and will continue until 2030. We have now entered an era of mass exodus in the workplace. This is a significant social (and economic) phenomenon that is hardly receiving any attention from the mainstream media. The traditional Retirement Planning is solely focused on financial security in which they cover the “means” but is void of “meaning.” This presentation focuses on the non-financial aspect of retirement. How do we lead a happy, meaningful life beyond our so-called “productive, child-rearing” years? Come learn how Baby Boomers are reinventing the ideal model of retirement, and how you can personally lead a more fulfilling life at any age. Yoshiko will be showing over 70 colorful slides and a few videos in this one-hour presentation which may transform your life!

### **TESTIMONIALS:**

- \* Very thought-provoking! Definitely got me thinking differently about retirement.*
- \* Even though retirement age is a decade or more so away, I think about my future years and this presentation has had a huge impact on how I am viewing the next decades of my life. Kept me very interested and engaged the entire time.*
- \* The presentation was very engaging and interesting. It was well structured and easy to follow with a very well thought-through flow. I would highly recommend this presentation to others.*
- \* Inspirational - Gives me hope for the future - makes me look forward to “retirement.”*
